## **M5 MODULAR CROWD CONTROL MUNITION (MCCM)**

The **MCCM** is intended to be a direct fire, **low hazard** munitions that produces a non-lethal effect upon impact. Targeted personnel are incapacitated or disoriented through flash-bang and stinging plastic balls. The effects last for approximately 10 seconds.

For crowd control, the M5 provides non-lethal counter personnel capability enabling forces to enforce a buffer zone make a show of force or break contact.

**Tactical, law enforcement or military detention personnel can employ the MCCM for a variety of mission profiles. The MCCM can be used by both mounted and dismounted troops.**

### **Payload**

The MCCM disperses 600 32-caliber plastic balls over a 60 degree-arc.

### **CAUTION**

**Use of the MCCM does expose the targeted personnel to risk of injury or death! This device is not harmless and is intended only for use as a graduated response before the application of lethal weaponry.**

### **DESIGN**

The M5 is patterned after the M18A1 Claymore to provide a visual deterrent. The rear cover is molded in light green to differentiate it from the standard M18A1. Raised diamonds are molded into the rear cover for tactile identification.

**THE M5 IS LIGHTWEIGHT, SAFE AND RELIABLE. THE M5 ALSO HAS A LONG-SHELF LIFE**

### **Effective Range**

- 5 to 15 meters
- Inside the 5-meter minimum standoff the M5 can cause serious injury or death. Outside the 15-meter range the effects can be minimal.
